Subject Index to Volume 3

A-1 broth test (Ratto) 519
A-1 test (Castillo) 535
Acidophillic algae (Mann) 1
Activated sludge (Koopman) 41
Activated sludge respiration test (Elnabarawy) 361
Activated sludge respiration test (Walker) 415
Additive interaction (Stratton) 345
AFNOR method (Vasseur) 331
Agar plate method (Baarschers) 129
Agent orange–mutagenicity (Soler-Niedziela) 136
Aldicarb (Mathes) 271
Algal biomass (Vasseur) 331
Algal blooms (Keijola) 643
Alkaline phosphatase (Burton) 255
Ames test (Sanchez) 75
Amylase (Burton) 255
Antagonistic interaction (Stratton) 345
ara^r assay (Soler-Niedziela) 138
Arylsulfatase (Burton) 255
Atlantic Canada (Menon) 679
ATP test (Dutka) 303
Autoanalysis colilert test (Edberg) 565
Avermectins (Rodrigues) 379

Bacillus subtilis (Matsui) 173
Bacterial growth inhibition (Robinson) 19
Bacterial growth test (Slabbert) 104
Bacterial mortality (Martinez) 35
Battery of bioassay (Slabbert) 105
Biochemical toxicity testing (Obst) 81
Bioconcentration (Mann) 2
Biological contamination (Hazen) 461
Biological test guidelines (Blaise) 385
Biological testing (Blaise) 385
Biotransformation of 1,8-DNP (Cerniglia) 147
Biphenyl derivatives (Lin) 161
Bi-valve test (Walker) 415

CAS (Kaiser) 195
Ceriodaphnia reticulata (Rao) 239
Chemical content of algae (Mann) 1
Chemical water quality (Niemi) 657
Chinese hamster ovary cell (Duffard AME) 117
Chronic toxicity (Rao) 239
Classification (Menon) 679
Clostridium perfringens (Hadas) 631
Coliform indicators (Ratto) 519
Coliphage (Castillo) 535
Coliphage (Hadas) 631
Coliphage (Loh) 451
Coliphage (Ratto) 519
Coliphages (Toranzos) 491
Coliphage (Suan) 551
Colony formation test (Slabbert) 104
Computer simulation (Mathes) 271
Crustacean tests (Walker) 415
Culturing technique (Barbaree) 479
Cyanobacteria (Eriksson) 511
Cyanobacterial toxins (Keijola) 643

Daphnia coli (Dutton) 245
Daphnia magna test (Dutka) 303
Daphnia similis bioassay (Sanchez) 65
Defined substrate technology (Edberg) 565
Degradation products for triclopyr, 2,4-D and picloram (Baarschers) 128
Dermatitis (Highsmith) 599
Detoxification process (Cerniglia) 147
Dioxin mutagenicity (Soler-Niedziela) 136
Dipyridyl derivatives (Lin) 161
Direct fluorescent antibody stain (Barbaree) 479
Dissolved oxygen (Kwan) 93
DNA damaging substances (Matsui) 173
Drinking water (Castillo) 535
Drinking water (Suan) 551
Drinking water treatment process (Keijola) 643

Early toxicity warning system (Obst) 81
EC50 values for triclopyr, 2,4-D and picloram (Baarschers) 128
E. coli (Hadas) 631
E. coli (Niemi) 657
Ecotoxicological assessment (Blaise) 385
Ecotoxicological assessment (Martinez) 36
Ecotoxicological risk assessment (Mathes) 271

Effective concentration (Rao) 239
Effect of 2,4-D on cell growth (Duffard AME) 117
Electron transport system activity (Burton) 255
Enterococci (Hadas) 631
Enteroviruses (Toranzos) 491
Enumeration of pathogens (Hazen) 461
Environmental effects (Walker) 415
Enzyme activity (Dutton) 245
Enzyme Assay (Obst) 81
Enzyme biosynthesis (Dutton) 245
Escherichia coli (Dutton) 245
Escherichia coli (Hayes) 287
Escherichia coli WP_2 reverse mutation assay (Sanchez) 55

Factors affecting distribution (Niemi) 657
Factors affecting INTF extraction (Koopman) 41
Factors affecting recovery (Barbaree) 479
Factors affecting the infection transmission (Highsmith) 599
Factors affecting toxicity (Vasseur) 331
Fecal coliform bacteria (Hazen) 461
Fecal coliforms (Fujioka) 613
Fecal coliforms (Hadas) 631
Fecal coliforms (Loh) 451
Fecal coliforms (Suan) 551
Fecal coliforms (Toranzos) 491
Fecal contamination (Toranzos) 491
Fecal indicators (Niemi) 657
Fecal streptococci (Fujioka) 613
Fecal streptococci (Toranzos) 491
Field kit (Loh) 451
Fish bioassay (Dutton) 245
Fish tests (Walker) 415
Fluorescent staining (Hazen) 461
Folliculitis (Highsmith) 599
Fungal growth inhibition (Baarschers) 129

β-galactosidase (Burton) 255
β-galactosidase (Dutton) 245
Gelrlite (Loh) 451
Genetic probe method (Barbaree) 479
Genotoxic agent (Hayes) 287
Genotoxicity (Auffray) 371
Genotoxicity (Lin) 161
β-glucosidase (Burton) 255
Growth inhibition test (Rodrigues) 379
Growth test (Walker) 415

H_2S paper strip test (Castillo) 535
H_2S paper strip test (Ratto) 519
Hazard assessment scheme (Blaise) 385
Hazard assessment (Torstensson) 407
Heavy metals toxicity (Martinez) 34
Hepatotoxins (Eriksson) 511
Hepatotoxins (Keijola) 643
Herbicide toxicity (Duffard) 117
Heterotrophic uptake (Burton) 255

IC50 (Dutton) 245
Indicators (Hazen) 461
Indicators (Toranzos) 491
Industrial waste (Martinez) 33
Industrial waste (Obst) 81
INT-dehydrogenase assay (Koopman) 41
INT dehydrogenase test (Baarschers) 128
INTF extraction (Koopman) 41
In vitro tests (Obst) 81
In vivo tests (Obst) 81
Iodonitrotetrazolium formazan (Koopman) 41
ISO method (Vasseur) 331
Ivermectin activity (Rodrigues) 379

Kinetic parameters (Mathes) 271
Klebsiella (Duncan) 581
—, in recreational waters
—, in drinking water supply systems
—, as a pathogen in the community
—, as a pathogen in hospitals
—, current status

Lake Kinneret (Hadas) 631
Landfill leachates (Blaise) 385
Land run-off (Fujioka) 613
Legionella detection (Barbaree) 479

Malaysia (Suan) 551
Mechanisms of action (Eriksson) 511
Medium composition (Vasseur) 331
Membrane lipid composition (Duffard AME) 117
Metabolites of 1,8-DNP (Cerniglia) 147
Metal sequestering capacity (Mann) 6
Microbial activity assays (Burton) 255
Microbial bioassay (Stratton) 345

Microbial toxicity assays (Slabbert) 101
Microbial toxicity testing (Dutton) 245
Microbial toxicity test (Stevens) 355
Microbiology of recreational waters (Highsmith) 599
Microcystis aeruginosa (Eriksson) 511
Microsome rec-assay (Matsui) 173
Microtox assay (Walker) 415
Microtox test (Dutka) 303
Microtox test (Elnabarawy) 361
Microtox test (Kaiser) 195
Microtox test (Robinson) 19
Microtox test (Sanchez) 59
Mixed bacterial cultures (Kwan) 93
Molluscan shellfish (Menon) 679
Monolayer culture assay (Duffard AME) 117
Motility test (Walker) 415
MPN test (Edberg) 565
MTF procedure (Edberg) 565
Mutagenicity (Auffray) 371
Mutagenicity (Hayes) 287
Mutagenicity of 1,8-dinitropyrene (Cerniglia) 147
Mutagenicity testing (Grifoll) 315
Mycotoxins (Auffray) 371

Neurotoxin (Keijola) 643
Nitrification inhibition (Stevens) 355
Nitrification (Mathes) 271
Nitrification rate inhibition (Robinson) 19
Nonlinear models (Torstensson) 407
Non-point loading (Niemi) 657
Nucleic acid analysis (Hazen) 461

OECD method (Vasseur) 331
Oxygen uptake assays (Slabbert) 102
Ozonation (Matsui) 173

Paraquat mutagenicity (Lin) 161
P-A test (Edberg) 565
Pathogenic indicators (Hadas) 631
Peptide toxins (Eriksson) 511
Pesticide decomposition (Torstensson) 407
Pesticide fate (Torstensson) 407
Photobacterium phosphoreum (Kaiser) 195
Pollution (Menon) 679
Polycyclic aromatic hydrocarbons (Grifoll) 315
Polytox test (Elnabarawy) 361
Positively charged filter (Toranzos) 491
Presence/absence test (Ratto) 519
Protease (Burton) 255
Pseudomonas aeruginosa (Highsmith) 599
Pseudomonas fluorescens growth inhibition test (Sanchez) 64

Raw water (Suan) 551
Rec-volume (Matsui) 173
Relative sensitivity (Walker) 415
Resazurin reduction test (Sanchez) 55
Respiration rate inhibition (Robinson) 18
Risk factors (Highsmith) 599
RK mutatest (Hayes) 287
Rotaviruses (Toranzos) 491
RTECS (Kaiser) 195

Saccharomyces cerevisiae reverse mutation assay (Sanchez) 61
Salmonella arabinose resistant assay (Soler-Niedziela) 136
Salmonella/microse assay (Grifoll) 315
Salmonella typhimurium reversion assay (Cerniglia) 147
Scenidesmus sp. (Rao) 239
Screening procedure (Stratton) 345
Screening test (Robinson) 17
Screening test (Stevens) 355
Sediment extract (Dutka) 303
Sediment extract (Grifoll) 315
Sediment extract (Rao) 239
Selenastrum capricornutum (Vasseur) 331
Seven-day bioassay (Rao) 239
Sewage effluent discharge (Fujioka) 613
Sewage treatability (Robinson) 17
Short-term bioassay (Grifoll) 315
Short-term bioassay (Sanchez) 55
Short-term test (Hayes) 287
Singapore (Suan) 551
Sister chromatid exchange (Soler-Niedziela) 136
SOS chromotest (Auffray) 371
SOS chromotest (Dutka) 303
SOS inducer (Auffray) 371
Spirillum volutans test (Dutka) 303
Spirillum volutans test (Sanchez) 65
Streptomyces avermetilis (Rodrigues) 379
S. typhimurium genotixicity test (Lin) 161

Surface water (Loh) 451
Surrogate test (Burton) 255
Synergistic interaction (Stratton) 345
Synthetic activated sludge (Kwan) 94
Synthetic sewage (Kwan) 94

Terrestrial environment (Toratensson) 407
Tertiary treatment (Matsui) 173
Thymidine incorporation (Martinez) 34
Total coliform bacteria (Hazen) 461
Total coliforms (Toranzos) 491
Toxicant impact assessments (Burton) 255
Toxicant interaction (Stratton) 345
Toxicant screening test (Dutka) 303
Toxicity and mutagenicity of industrial effluents (Sanchez) 55
Toxicity assessment (Elnabarawy) 361
Toxicity bioassay (Kaiser) 195
Toxicity data compilation (Kaiser) 195
Toxicity of industrial effluent (Robinson) 28
Toxicity of triclopyr, 2,4-D and picloram (Baarschers) 127
Toxicity screening (Elnabarawy) 361
Toxicity screening test (Kwan) 93
Toxicity screening tests (Slabbert) 102
Toxicity (Walker) 415
Toxic metabolites (Obst) 81
Toxic metals (Mann) 1
Tropical waters (Hazen) 461
TTC dehydrogenase test (Sanchez) 59

US EPA method (Vasseur) 331

Wastewater treatment processes (Elnabarawy) 361
Wastewater treatment (Stevens) 355
Waterborne diseases (Hazen) 461
Water quality (Blaise) 385
Water quality evaluation (Slabbert) 102
Water quality indicator (Fujioka) 613
Water quality indictor (Castillo) 535
Water quality (Menon) 679
Well water (Loh) 451
